We were frequently obliged to get up in the night and rub him with soda in water, strong liniments, etc. Finally, we called other physicians, until no less than six had attempted to cure him, all slike failing, and the child steadily getting worse and worse, until about the 20th of last July, when we began to give him Cuticura Resolvent internally, and the last of August he was so nearly well that we gave him only one dose of the Resolvent about every second day for about ten days longer, and he has never been troubled since with the horrible maladay.
